

Coppin State University Policy - Student Health Insurance

Mandatory Health Insurance Fee

All registered undergraduate students taking 12 or more credit hours, including off campus students taking internet courses are **automatically** enrolled into the University selected student health insurance plan.

Health Insurance Fee Waiver

All registered undergraduate students taking 12 or more credit hours covered by other comparable health insurance, may decline the Coppin State University student health insurance by completing an electronic Online Waiver form located on the University's webpage during the allotted 30 day period in the **Fall and Spring semesters**. Per semester the students will be informed of the waiver period. For the waiver request to be considered, students must complete this form each semester by the waiver deadline. If the student experiences a problem with the waiver site, they must call (410) 951-3958, **prior to the waiver deadline date**. Once the waiver request is submitted, students will be notified via email whether their waiver request has been received. **Students are advised to print the "waiver complete" page and confirmation email; and keep as a waiver proof for their records. Waivers will not be accepted after the deadline.** If you do not waive out of the health insurance by the deadline date, the per semester premium cost for this plan will remain, non-refundable on your tuition bill.
